Colour: NEAR COLOURLESS (F-G)

## Your Guide To Buying Diamonds

**CUT:** A good cut brings out more sparkle and it therefore commands a higher value.

**COLOUR:** Diamonds come from a wide range of colours ranging from D (colourless) to Z (deeply coloured).

**CLARITY:** Perfectly clear diamonds are a rare find. The fewer and smaller the inclusions, the more the diamond will sparkle.

**CARAT:** The weight of a diamond is measured in carats. 1 carat equals 0.2 grams or 100 cents.
